HYACINTHS

Directions for Culture in Pots. Select solid, heavy bulbs and plant as early as possible, using a six or seven inch pot for a single bulb. Fill the pots with a light, rich potting soil, and have the top of the bulbs just above the surface; give a good watering and set away in a cool place, covering them with about five inches of sand or coal ashes. In about eight weeks they may be taken to the room in which they are to flower. By bringing in a few pots at a time about two weeks apart a succession of bloom may be had.

Glass Culture. Single Hyacinths do better than double in glasses, as they produce a much larger and more showy truss. Place the bulbs in the glasses, which should be filled with water so it touches the bottom of the bulbs; put them in a closed box in a cool place, or on a shelf in the dark part of the cellar, for from six to eight weeks, changing the water every ten days or two weeks; then remove them to the light. If then placed in a cool room they will produce very fine spikes and remain in bloom a long time. A small piece of charcoal in the water is beneficial.

Planting in the Open Ground. October and November is the proper time, but they can be set out any time as long as the ground is open and the bulbs remain sound. The best compost for their culture is the following: One-third river or sea sand, one-third well-rotted cow manure, and one-third good garden mould. The beds composed of the above compost should be well dug to a depth of fourteen inches, and raised from two to four inches above the level of the walks. The bulbs should be planted evenly about six inches deep (to the bottom of the bulbs), and from five to six inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs, setting each bulb in a handful of clean sand, which insures drainage.

Selected Named Hyacinths

Second Size

Double Hyacinths

These Hyacinths are really a small first size and we strongly recommend them where the finest effects are required for either forcing or bedding. The varieties named below are of unsurpassed excellence for producing fine color effects, being of distinct and decided shades and of uniform height. They all blossom at the same time.

SINGLE PINK. Gigantea, Morena, Fabiola.

SINGLE RED. Rob. Steiger, Gertrude, Lord Macaulay.

SINGLE WHITE. Blanchard, La Grandesse, L'Innocence, Mme. Van der Hoop.

SINGLE BLUE. Chas. Dickens, light; Grand Lilas, light; Leonidas, bright; King of the Blues, dark.

Each 8c., doz. 75c., 100 \$6.00.

Miniature Hyacinths

Bulbs under this heading are much smaller than the ordinary Dutch Hyacinths, and are extensively used for forcing. They are more attractive than the French Romans, and when properly forced, throw very fine spikes of bloom. They have proved perfectly hardy, slightly protected, and are fine for cutting purposes.

PURE WHITE, TINTED WHITE, PINK, CRIMSON, LIGHT BLUE, DARK BLUE, MIXED COLORS. Doz. 50c., 100 \$3.00.

Extra Selected Hyacinths

For Bedding and Forcing

These are grown for our trade and must not be confounded with the so-called Mixed Hyacinths sold by some, containing the cullings of the trade, immature, undersized bulbs. For massing in borders or design work, or for forcing, they are well adapted. Our mixture is composed of bulbs which are nearly of the same height and flower simultaneously.

Early White Roman Hyacinths

For forcing purposes the Roman Hyacinth has no equal. If planted early in September and gently forced, it will bloom in November, or its flowering may be deferred until Christmas by keeping it in a cool place. One bulb throws up a number of spikes, and the flowers are deliciously scented.

DOUBLE ROSE PINK ROMANS

The form of these Hyacinths is similar in appearance to the Single Roman, excepting in the flower, which is a very distinct double, exceedingly pretty and effective; stands a long time in flower. Doz. 60c., 100 \$4.00.

SINGLE LIGHT BLUE ROMANS

Delicate semi-double flowers on stiff stalks, of a pale-blue color, very fragrant. Keep a long time when cut and placed in water. Used for forcing and table decoration. Doz. 50c., 100 \$3.50.

SINGLE DARK ROSE ROMANS

This pretty form of Hyacinth much resembles the well-known White Roman Hyacinths, except in color. They come into blossom about ten days later, taking the place of many of the early flowering bulbs long past bloom. Their delicate shades of color form a pleasing contrast when placed among other flowers and plants. Doz. 50c., 100 \$3.50.

ITALIAN HYACINTHS

These, like the French Roman Hyacinths, are grown largely for cutting. Flowers single, graceful and fragrant. Hardier than the Romans, and may be planted outside in the Fall for early Spring cutting.

Single White Italian. Each 6c., doz. 50c., 100 \$3.50.

MISCELLANEOUS HYACINTHS

WHITE MOUNTAIN HYACINTHS

The White Mountain Hyacinth resembles the White Roman, and is one of the best for forcing. They generally throw several spikes of bloom, but when only one flower is given it is as large and very similar to that of a Second Size Dutch Hyacinth. Doz. 50c., 100 \$3.50.

CAPE HYACINTHS

(Hyacinthus Candicans)

A beautiful plant, with flower stems 3 to 4 feet high, bearing from 20 to 30 large, pure white, drooping flowers. Each 5c., doz. 60c., 100 \$3.50.

BLUE GRAPE HYACINTHS

A variety producing flowering spikes, about 8 inches high, with small round bells, so arranged as to resemble a bunch of grapes. Doz. 15c., 100 75c.

MUSK HYACINTHS

A small Hyacinth of purplish color, emitting, when in flower, a strong musky odor. Each 25c., doz. \$2.50.

FEATHERED HYACINTHS

In this variety the spikes are 10 inches high, producing feathery-like flowers, which are useful for cutting. Doz. 25c., 100 \$1.50.

SINGLE DARWIN TULIPS

The Most Exquisite Race of the Late Flowering Tulips

This class is comparatively new and undoubtedly the best of the late-flowering Tulips. These Tulips grow from 24 to 36 inches high; the flowers are borne on strong, stiff stems, and are resplendent in some of the finest shades known among flowers. They are excellent for cutting, perfectly hardy and need not be removed after blooming; being of such tall growth, they are just what is wanted for groups among shrubbery.

The foliage of this Tulip is extremely robust and accompanies the stem to a height of fully 12 inches, thus lending more charm to the flower when cut. Their flowering season is toward the end of May. Too much cannot be said in favor of this handsome class, and they should be in every garden.

Single Named Tulips

Nothing is more beautiful than a bed of Tulips in the Spring. They should be planted in beds about 4 inches apart, and four inches deep. Tulips are also excellent for growing in the house; four or five bulbs in a six or seven inch pot, or they can be forced in the greenhouse with good results. For forcing, single Tulips are the best, Duc Van Thol varieties being the favorites, as they flower earlier on account of their dwarf habit. The figures indicating the average height are given before each variety, to aid selection for beds.

W. & D.'s Special Mixed Single Tulips This mixture contains an elegant assortment of all the colors. Doz, 25c., 100 \$1.25, 1000 \$9.00.

Double Named Tulips

The earlier varieties of this class of tulips are admirably adapted for forcing. Many of the other varieties make a fine display when grown in pots, but they should be forced slowly.

The later kinds are very effective for bedding, producing a dense mass of gorgeous flowers, which remain in bloom a long time.

Double Tulips are very handsome, especially when planted in separate colors, such as scarlet, white and yellow. A most brilliant display can be had by placing them in square, diamond, or round-shaped beds, and we shall be pleased to name the varieties most suitable for this purpose if so desired. Double Tulips remain longer in bloom than the single varieties, therefore should not be planted together.

TRUMPET MAJOR. (French.) Large, early; deep golden yellow; earliest for forcing. Doz. 35c., 100 \$2.25.

VAN SION. (Single.) Large yellow trumpet; a fine and distinct form, early and grand for cutting. Doz. 30c., 100 \$2.00.

MIXED SINGLE NARCISSUS. Doz. 25c., 100 \$1.50.

Of easy culture and equally satisfactory for potting and the open bed and borders, where their rush-like glaucous foliage and white and yellow flowers are very much admired. The soil should be well loosened so that the roots have perfect freedom. May be planted from September to January, in pot or open border, treated in same manner as hyacinths. Many varieties are sweet scented; valuable for cut flowers in early Spring.

Albicans. Primrose trumpet, white petals. Doz. 75c., 100 \$5.00.

Ard Righ (Irish King). Magnificent golden-yellow trumpet, very large. One of the earliest and best for forcing. Each 10c., doz. 90c., 100 \$6.00.

Poeticus Narcissus

DOUBLE NARCISSUS, OR DAFFODILS

Double Narcissus, or Daffodils, as they are generally called, are one of the favorites of Spring flowering bulbs. They are perfectly hardy, of easy culture, and can be forced very readily. Their beautiful and graceful appearance and habit are very much admired.

Alba Plena Odorata (The Double White Poet's Narcissus). Exquisitely scented, fine for forcing. Doz. 25c., 100 \$1.25.

Incomparabilis, fl. pl. (Butter and Eggs). Yellow, very double. Doz. 25c., 100 \$1.50.

Orange Phoenix (Eggs and Bacon). Large double white, rich orange-scarlet segments; splendid for pot culture and cutting. Doz. 30c., 100 \$2.00.

Sulphur, or Silver Phoenix (Coddings and Cream). Large creamy white flowers with pale sulphur center, excellent for forcing. Each 10c., doz. 60c., 100 \$4.00.

VAN SION, YELLOW (Double Nose). Large golden yellow; undoubtedly the most popular variety grown. The bulbs are double nosed, and will produce two or three flowers; it is one of the earliest for forcing. Doz. 50c., 100 \$3.00, 1000 \$25.00.

VAN SION (*Telamonius Plenus*). Extra size bulbs. The double yellow Daffodil; one of the best for forcing. Doz. 35c., 100 \$2.50, 1000 \$18.00.

CHINESE SACRED LILY

Oriental Narcissus, or Fairy Flower, as they are generally called. Comes into flower four or five weeks from time of planting. Flowers white, yellow cups, in bunches of five to six on each stem.

An open dish, half filled with pebbles, is the most suitable and convenient way to grow them, although they will succeed admirably in pots. Each 10c., doz. \$1.00.

Freesia Purity

FREESIA

This is one of the most beautiful of all Cape bulbs, possessing a peculiar grace of form, and its fragrance is most delightful, one pot of five or six bulbs being sufficient to perfume a whole house. As cut flowers they are extremely valuable; the unexpanded blooms, opening in water, fill the air with the most delicate perfume, and their endurance is really remarkable. They force very easily, and can be had in flower at Christmas, and continue in succession until June. When potted these should not be placed in a dark place like most other bulbs, but should be put directly in the light.

Purity (New). A grand variety bearing large clusters of magnificent pure white flowers on extra long stiff stems, one truss bearing from 8 to 10 delightfully fragrant blooms. Doz. 50c., 100 \$4.00.

Refracta Alba. Pure white, blotched with yellow.

Packed in boxes containing 500, 1000 and 2500 Pips.

Lily of the Valley Clumps (Ready about 1st of November)

Are generally used for outdoor planting, and should be placed in a shaded locality, where they can be left permanently. They are the most popular of Spring flowering plants, and are greatly admired on account of their graceful appearance and delicate bell-shaped, pure white flowers; highly prized for cutting in the early Spring. They can also be forced in pots for Winter flowering.

Selected Clumps. Each 30c., doz. \$3.00.

AMARYLLIS

Probably the most magnificent and gorgeous bulbous plant known. Their immense flowers, richness of coloring and regal habit are simply incomparable. They throw up spikes from 18 inches to 3 feet high, bearing enormous trumpet-shaped flowers, averaging each 6 to 10 inches across.

Aulica. (Lily of the Palace). Crimson, shaded with green. Each 50c.

Equestris. Light, rich scarlet, marked with white bars in the center of the throat. Each 15c., doz. \$1.50.

Zephyranthes Rosea. Large pink colored flowers. Each 5c., doz. 50c., 100 \$3.00.

LILY OF THE VALLEY PIPS

(Ready for Delivery in November)

The Lily of the Valley is one of the most useful and greatly admired plants grown; the modest bell-shaped flowers of purest white are highly prized for cutting purposes, and for flowering in pots in the Winter they are exceedingly well adapted and will last several weeks in beauty. By taking them in at intervals a succession of flowers may be kept up all Winter. They are also forced in immense quantities by florists, but they are the most charming when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy.

Strong Berlin Pips. Doz. 40c., 100 \$2.50, 1000 \$18.00.

Selected Hamburg Pips. Doz. 30c., bundle of 25 50c., 100 \$1.75, 1000 \$14.00.

Lily of the Valley Pips Cold Storage

Forcing cold storage Lily of the Valley is not an experiment; when the pips are right, no forcing is required; they will mature in 20 to 30 days under ordinary treatment. Extra strong 3-year-old pips:

For other Lilies, see page 18.

Lilium Longiflorum

HARDY LILIES

For Outside Planting

Lilium Auratum

Lilies are matchless among hardy plants for beauty of form and variety of color in the garden. They commence flowering in May, and with the various species maintain a continuous and unbroken succession of bloom until Autumn. No class of plants, capable of being cultivated out-of-doors, possesses so many charms; their stately habit, rich and varied colored flowers, often deliciously fragrant, and easy culture, render them so distinct from all other hardy plants that no collection, however select, should be without a few of the choicer sorts.

AURATUM (The Golden Lily of Japan). Delicate, white, thickly studded with crimson spots, and through the center of each petal is a bright gold band; large and fragrant.

TOMATO**THE DON—Extra Early Forcing**

Notwithstanding the numerous New Tomatoes introduced in recent years, this grand variety, sent out by us in 1905, possesses all the qualifications to enable us to state that it is the Best Forcing Tomato ever offered.

The fruit is of medium size, dark red in color, very smooth, solid, and almost globe shaped. The plants form 3 to 6 stalks, and average 6 feet in height with comparatively very little foliage.

It is remarkable for its bearing qualities; the plants are covered with clusters of fruit averaging from 5 to 9 Tomatoes in each cluster, bearing right down to the bottom of the stems. It is also very valuable for first crop outside planting. Pkt. 25c.

W. & D.'S STIRLING CASTLE

Our Stirling Castle Tomato has proved itself to be one of the finest early Tomatoes ever offered for forcing and outdoor planting. The fruit is round, of medium size, smooth, and almost seedless. Color bright scarlet, excellent quality, and a heavy cropper. Pkt. 15c., oz. \$1.50.

"Best of All." This Tomato sets freely, fruiting low down and all up the stem; dwarf habit and very prolific. Fruit of good size, and solid; color deep scarlet. Per pkt. 10c., oz. 50c., $\frac{1}{4}$ lb. \$1.50.

Eclipse Forcing. A variety of the highest merit; it is a free setter, producing a great profusion of attractive fruit of a fine red color and high quality; one of the best for forcing. Per pkt. 15c., oz. \$1.50.

Improved Lorillard Forcing. Possesses extra good forcing qualities, ripens very uniformly over the whole surface; very solid, smooth and well flavored; a splendid variety for open air as well as for forcing. Per pkt. 15c., oz. 50c., $\frac{1}{4}$ lb. \$1.50, lb. \$5.00.

WEEBER & DON'S

Central Park Lawn Grass Seed

OUR formula for this mixture embraces all the most desirable dwarf evergreen grasses which flourish at different seasons, ensuring a permanent verdure. The varieties used are those which form a compact sward, excluding the chances of burning out from excessive heat in Summer. The seeds are of the choicest quality, free from obnoxious weeds and foreign substances, thus providing an absolutely clean and velvety lawn. Seed sown in the Fall will produce a fine, luxuriant lawn the following season. We recommend using four bushels of seed to the acre; the thicker the seed is sown the sooner a smooth perfect lawn will be obtained. One quart of seed will sow a space 15x20 feet.

Per quart 25c., per peck \$1.50, per bushel (20 lbs.) \$5.00.

FARM SEEDS

WEEBER & DON'S SPECIAL MIXTURE OF GRASSES AND CLOVERS

FOR HAY AND PERMANENT PASTURE

We have made **Farm Seeds a Specialty** for many years, during which we have carefully studied the various properties of the different grasses. We have now prepared a mixture of Perennial varieties bound to give satisfactory results. While the cost is greater than for Timothy and Clover, the grower should recollect that the mixture we sell will last three or four times longer than the other.

This special mixture may be sown either in the Spring or Fall, using **three bushels of seed** to one acre, with an additional **ten pounds of mixed clover sown in the Spring**.

Special Mixture, per bush. (14 lbs.), \$2.50.

Mixed Clover, per lb., 25c.

Made of heavy leather in a very substantial manner. These are almost indispensable on fine lawns, preventing injury to the sward by the horse's feet. Price, set of four, \$9.00. Large size, \$10.00.

The Apollo Lawn Sweeper

The machine consists of a revolving brush which throws the sweepings forward into the large grass box, which, when full, is dumped by merely pulling a cord. It removes all cut grass, leaves, twigs, and by setting it low it is excellent for taking out crab grass. It is also valuable for sweeping walks, stables, etc. Price, 20 in. sweep, \$11.00, 28 in. \$13.00.

SUNDRIES

WEEBER & DON'S LAWN INVIGORATOR

This fertilizer is especially prepared for use on lawns, meadows, and pasture lands as a top dressing. Use from 600 to 1000 pounds per acre when seeding down, and from 400 to 600 pounds per acre as a top dressing. 5 lbs. 30c., 10 lbs. 50c., 25 lbs. \$1.00, 50 lbs. \$2.00, 100 lbs. \$3.50, 200 lbs. \$6.50, ton of 2,000 lbs. \$50.00.

ASHES, CANADA WOOD

Unleached

For lawns, gardens and fruits, Hardwood Ashes are unequalled; they supply natural plant food, permanently enriching the soil. Clean, free from offensive odor. They are exceedingly valuable for lawns, and destroy many of the insects which are so injurious. Apply 3,000 lbs. per acre. Per bbl., about 200 lbs., \$3.00, ton (2,000 lbs.), in bbls. \$22.50.

BONE MEAL.

This is a very pure, finely-pulverized form of ground bone, especially prepared for rose culture, top dressing for lawns, and for potted plants. Per lb. 10c., 10 lbs. 50c., 100 lbs. \$2.50, 200-lb. bag \$4.50, per ton \$36.00.

CRUSHED BONE

A coarse grade, well adapted for grape-vine borders. Per 100 lbs. \$3.50, per ton \$60.00.

BOWKER'S FOOD FOR FLOWERS

An excellent fertilizer for house plants. Easily applied by dissolving in water. Clean to handle, without odor, produces rich green growth and profusion of flowers. Small package 15c., large package 25c.

CLAY'S FERTILIZER

This is one of the best manures for all horticultural purposes, either in greenhouse or garden, and we believe its high reputation is well deserved. It is productive and lasting, and notwithstanding its apparently high price, it is quite economical.

Per 14-lb. bag \$1.25, 28-lb. bag \$2.25, 56-lb. bag \$4.00, 112-lb. bag \$7.00.

SALT, AGRICULTURAL

Used for top dressing, asparagus beds, etc. Should be used in the spring. Price, bbl., about 300 lbs., \$3.00.

LAND PLASTER OR GYPSUM

This is an excellent addition to land for such crops as require lime and sulphates, particularly turnips, potatoes, grasses, etc. Per bbl., about 250 lbs., \$2.00, per ton \$15.00.

MURIATE OF POTASH

Sure Crop Mushroom Spawn

A FEW DIRECTIONS FOR FORMING MUSHROOM BEDS

THE Mushroom is one of the most profitable crops grown, especially in the vicinity of large cities, where the demand, at all seasons, is far in excess of the supply. The best time for making mushroom beds is in August and September, as in the Fall months the natural heat is sufficient to cause the spawn to germinate freely, and the beds made then ought to bear well before and up to Christmas. Mushrooms can be grown in sheds, cellars, caves, under benches in green-houses, and in regular mushroom houses.

In preparing the materials, collect sufficient fresh horse droppings to form the desired size of bed, spreading them out in an airy shed to dry, and turning them frequently. When in a proper state as to dryness, which will soon be learned by experience, make these into a bed from nine inches to one foot thick, beating them firmly together. If the droppings have been properly prepared, gentle fermentation will soon commence, and when the temperature of the bed is from 75° to 80°, with no danger of its rising higher, put in the spawn. This is done by making shallow holes, about 9 inches apart, inserting pieces of spawn about the size of a hen's egg, and covering with the dung, pressing this closely about the spawn. It is of the greatest importance that the temperature of the bed should not decline below 75°, nor rise above 80°, for a month after spawning. Within a fortnight after putting in the spawn cover the bed about two inches thick with good mellow, moist soil, making this firm, and if under

Mushrooms

this a covering one or two inches thick of cow dung in about the same condition in moisture as the soil, can be afforded, this will cause the bed to last longer, and also to produce a larger crop than if covered with soil only. The most suitable temperature for beds in bearing is 50° to 55°, and as a high temperature causes the mushrooms to come small, this should be avoided. Watering beds in bearing often causes the small mushrooms to damp off; therefore water only when the bed ceases to be productive, and then use the water about the same temperature as the bed.
